

Health and Safety Policy Statement

Buro Happold is committed to enhancing the physical and mental wellbeing of all our employees. It is our Health and Safety (H&S) policy to create and nurture a safe working environment and to do all that is reasonably practical to not only prevent physical injury or emotional distress, prevent damage to property and to protect everyone from foreseeable work hazards but create a culture where everyone can thrive. This includes our communities, visitors and the public insofar as they come into contact with Buro Happold or its operations.

Within the organisation we will:

- Work honestly, competently and conscientiously always.
- Ensure, so far as is reasonably practicable, the health, safety and welfare at work of all our employees, public and visitors who may be affected by our acts or omissions.
- Go beyond simply ensuring compliant working practices, towards ones that encourage our employees to flourish.
- Promote a culture where H&S and wellbeing matters are routinely considered in everything, we do.
- Treat mental health problems seriously and support employees faced with mental health issues.
- Continuously improve every aspect of our work and that of our projects through our approach to safety.
- Provide regular information and training to ensure the health, safety and wellbeing of all employees.
- Provide a framework for continual improvement by setting and reviewing H&S objectives and targets.

All employees have a shared responsibility to implement this policy by following established H&S procedures so that we can all work together to nurture an equitable culture of wellbeing; raising and maintaining high standards throughout all areas of our business.
